Forecast for Sunday 03 Apr 2022

Weather: Dry through the early hours with some clear spells or high based clouds, and a severe chill. A dry and bright start to the morning but cloud will quickly thicken, and rain or hill snow will move into the northern peaks by midday. A very wet afternoon with persistent heavy rain or hill snow giving drenching conditions, and widespread hill fog will give very poor visibility at times. There will be a risk of blizzard conditions for a time late morning/early afternoon, before snow transitions to rain, with strong westerly or southwesterly winds, strengthening to gales at elevation.

Chance of cloud-free hill tops above 800m: Greater than 90% until early morning. Lowering to 50% by midday and near zero chance in the afternoon and evening.

Low cloud and visibility: Good visibility until early morning with small amounts of low cloud with bases above the summits. Isolated cloud bases 600-800 m by midday, mainly north. Moderate or poor visibility in the afternoon and evening due to rain and hill snow, and falling very poor in hill fog with widespread cloud bases 200-400 m.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Met Office Aberdeen Meteorologist's View
There will be a significant contrast in the weather from morning to afternoon, with a multitude of hazards developing. Drenching conditions expected, further increasing the risk of severe chill.

Forecast for Monday 04 Apr 2022

Weather: Heavy and persistent rain will continue until late-morning on Monday. For the rest of the day there will be showers or longer spells of rain, falling as snow on the northern hills such as Ben Hope and Ben More Assynt, and occasional hill fog. Strong or gale westerly or northwesterly winds, easing later.

Maximum wind: Westerly or northwesterly mean 40-45 mph gusting 50-60 mph.

Chance of cloud-free hill tops above 800m: Near zero increasing 40% by midday.

Low cloud and visibility: Moderate or poor visibility in the morning due to rain and hill snow, and falling very poor in hill fog with widespread cloud bases 200-400 m. Cloud bases lifting to 400-700 m in the afternoon with isolated hill fog, and visibility improving to good where rain eases.

Temperature: **Glens:** Plus 7 Celsius.
At 800m: Plus 4 Celsius falling to minus 1 Celsius.
Freezing level: Above summits, lowering 1000-1200 m in south and 200-400 m in north.
